

# CreaseGo™

## Silicone Elastomer Remover

### CreaseGo™

CreaseGo removes Silicone Elastomer, such as Supercrease® and Creaset®, from pants' and other garment's creases. CreaseGo is available with a handy applicator. CreaseGo is odor free and environmentally friendly. It's biodegradable and meets the requirements of California's Prop-65 and V.O.C. regulations.

### DIRECTIONS

Before starting, read and understand the CreaseGo Material Safety Data Sheet. Wear neoprene or rubber chemical-resistant gloves and eye protection when using CreaseGo.

**Filling Top-Fill Applicator:** Unscrew where the label says "Unscrew, then remove valve to Fill", carefully remove the internal valve and fill the applicator with CreaseGo. Do not overfill. Reposition the valve into the applicator, close the applicator and charge nib with CreaseGo.

**Filling Bottom-Fill Applicator:** Unscrew where the label says "Fill Here" and fill the applicator with CreaseGo. Do not overfill. Close applicator and charge nib with CreaseGo.

**Charging Nib:** Charge the applicator nib with CreaseGo by pressing the nib against a non-porous surface. Let capillary action wet the nib. Release nib from surface to close valve.

**Using CreaseGo:** Place garment treated with Silicone Elastomer on a flat, non-porous surface. Apply CreaseGo to the Silicone Elastomer bead using the applicator nib. Minimize CreaseGo application onto the fabric. Wait approximately 15 seconds before carefully scraping off the Silicone Elastomer bead using a non-abrasive round-nosed scraper (A penny works well.). If necessary, re-apply CreaseGo and repeat scraping procedure. Let the garment air dry in a well ventilated area. Spotting board compressed air and vacuum will accelerate drying.

**Note:** CreaseGo is safe to use on most colors and fabrics. Test on hidden area of garment before using on delicate colors or fabrics.
