Jeff Schwartz

A.L. Wilson Co.

Dear Jeff,

You graciously gave us your new GreenEarth spray spotter, "G-Go", to use in advance of our GreenEarth conference and upcoming Clean Show. The results we have seen just after a week have been fantastic. The fact that we can use a product like this right out of the bottle and prespot the way used to has been great. Spray it on, brush it in, run it wet. Terrific! We now have your other new product, "Tar-go EF", on our spotting board as well. Another contribution to our efforts to show our customers we care about the environment.

It gave us another reason we are so glad we made the switch to GreenEarth silicone solvent. The fact that old line companies such as yours are making the same commitment and investment to the drycleaning industry as we are says volumes. Keep up the good work.

Sincerely,

Marc Casassa, GM
