Dear Mr. Schwarz:

I have been in the dry cleaning business for over 25 years. I have always believed in "Jinx Ink". About six months ago I tried some "InkGo" - because the Wilson representative was so informative and friendly. I ordered it thinking "I'll try it but it won't be as good a product as I am used to working with. Well.. I was so wrong! It has made my job easier and it is so effective with ink removal! I have also found that I can remove foreign dyes and even finish off removing wine s and other difficult stains. I apply a little steam to the spot then put some "InkGo" on the spot, walk away and it is amazing.. It is gone! I am impressed and sold on this product. Thanks so much!!

Frances Moseley

Dear Mr. Edwards,

I have been a cleaner/spotter for the last eighteen years and have used many different stain removal chemicals during that time. InkGo is the first ink stain removal product that I have used that is gentle enough to remove ink from silk and pigment dyed garments, yet is still powerful enough to remove stubborn ink stains. My drycleaning plant has been using InkGo for over a year with terrific results. I just wanted to say "THANK YOU WILSON CHEMICAL"!!

Sincerely,

Jim Desjardins

To Fred Schwarzmann,

As the production manager at AlSCO in Eugene Oregon, we have a lot of problems with ink stained garments. We have tried all sorts of different methods and products to remove ink stains. We even went as far as getting a special formula put into one of our washers in hopes of recovering some of the garments, yet to no avail. Nothing we tried worked.

Then one day when I got to work I was looking through the latest issue of Textile Rental and I ran across an ad for your product, (InkGo). This product has proven to be absolutely phenomenal. I was amazed at how well it works. I would recommend this product to anyone with ink stain problems.

Thank you for coming up with a product that really works. Keep up the good work.

Dear Mr. Schwarz:

We have been using your new "InkGo" product for about a month and have noticed a remarkable improvement. Shirts that we once discarded because of ink stains are continuing to bring in revenue due to your product.

Keep up the good work and your willingness to "build a better mouse trap".

Sincerely,

Production Manager

UniFirst of Mesquite, TX uses New InkGo as follows:

- *Apply New InkGo directly to ink stain*
- *Let it sit overnight*
- *Flush out in regular wash formula between 145 and 165° F*

Jeff:

I just wanted to thank you for your recent visit and training on the use of Wilson Chemicals. At the same time, I want to inform you that we are almost done with the 1000 pounds of stained linen that we couldn't clean with the chemicals that we had been using. All of us here are very excited that we have recovered about 90% of the linen with the Sogo Reclamation Kit.

For your information in the past the ink and blood stains used to be the most serious problem for us but with InkGo and QwikGo, we don't go into shock anymore when we see one of those stains.

Another of your products that has been a blessing to our property is the Laundry TarGo because we do not discard napkins and pillowcases due to lipstick anymore. Jeff, I also wanted to mention that another reason why I'm happy with these products is because they are very safe to use. Every employee that come across a stained piece of linen can apply the products immediately.

For your information one of the things I am very proud of is that during my seventeen years working in housekeeping I have always managed the department with excellent safety records. For instance, last year we reached 506 days without incident.

Thank you again for the training and all the support and for the great products.
