

ExGo[®]

**SILVER NITRATE
REMOVER**

ExGo[®]

ExGo is used primarily to remove photo developer, x-ray developer and silver nitrate residues from fabric. ExGo also removes non-ferrous tarnish from fabric as well as from metallic surfaces such as buttons. Finally, ExGo can be used to neutralize PermaGo[®] after use.

DIRECTIONS

Before starting, read and understand the ExGo Material Safety Data Sheet.

◆ **To Remove Stains on the Spotting Board:**

Apply ExGo directly to stained area and let stand until stain disappears.
(Heating ExGo with dry steam will increase its ability to remove tough stains.)
Rinse thoroughly with water after stains disappear.

◆ **To Neutralize PermaGo[®]:**

Use complete PermaGo directions printed on PermaGo bottle.

* * * * *

- ExGo is safe for use on most colors and fabrics. Test ExGo on hidden area of garment before using on delicate colors and fabrics.
- Keep ExGo in warm place. ExGo crystallizes at low temperatures, but this does not alter its effectiveness. Crystals will redissolve when warmed.
